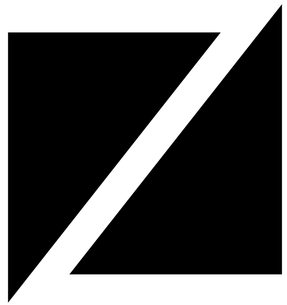
ZSQUARE

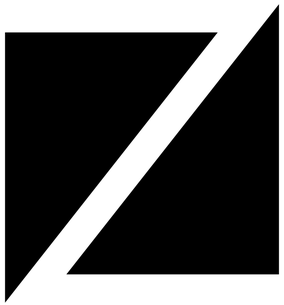
A high-performance, single-use endoscopic platform
with ultra thin, flexible, high-resolution optic fiber.

Deliverables: *Communications strategy, branding, investor & product deck, website, one pager, dashboard UI UX, GTM, events, PR*

The Concept

Seeing the invisible





ZSQUARE

ENDOSCOPY. TRANSFORMED.

PearlCom Marketing Matters

SEEING THE INVISIBLE
High-Performance Single-Use Endoscopy

Our single-use endoscopes remove the possibility of cross-contamination due to poorly sterilized reusable endoscopes

Globally Recognized & Awarded Innovation

Zsquare wins prestigious innovation and design awards in recognition of its disruptive technology, marking a year of outstanding public recognition and a vote of confidence in its innovative technology

EDISON AWARD FOR INNOVATION >

reddot award 2020 winner

REDDOT DESIGN AWARD >

High-Resolution. Small Diameter. Single-Use.

Zsquare's uniquely patented polymeric fiber is a disruptive breakthrough in the world of minimal-sized visual fiber optics, creating the only ultra-thin, high-resolution, extremely flexible, single-use endoscopic platform.

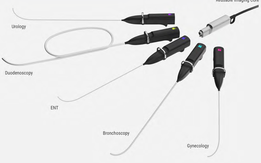
Our technology enables, for the first time, to dramatically reduce the optical component's diameter without compromising and even improving image quality to achieve never-before-seen visualizations.

Square Fibers. Modular Platform. Multiple Indications.

Starting from a single square fiber, Zsquare endoscopes are transformed into a powerful range of products by expanding the number of clustered fibers. As more fibers are assembled, different medical indications can be addressed, with added functionality and enhanced performance

Gastroenterology Laparoscopy

Single-Use Endoscope Product Line



Multiple High-end Capabilities

Our Edge

- Elimination of cross-contamination
- Cost savings
- Access to unserved indications
- Platform scalability
- Superior diagnostic capabilities
- Democratization of care

Careers

Optics Engineer
We are looking for a highly motivated & talented optics engineer to join our team in the development and testing of our illumination system.
Read more

Software and Algorithm Developer
We are looking for a talented software and algorithm developer to join our team in the development of our application using Python, machine learning, image processing and computer vision. The developer will be responsible for integrating our algorithms to the applications.
Read more

Mechanical Engineering Team Leader
We are looking for a highly motivated and talented mechanical engineer to join our mechanical engineering team. The mechanical development of our endoscope.
